Blue Mind-Blue School	EA.BG.SG53.020.2019	PT-INNOVATION-0029	Fundação Luso-Írã para o Desenvolvimento Humano		Solidif Raknes	Centro	Ocean Literacy	The BlueMind-Blue School project aims to ensure that water sports in schools in Portugal can be equipped with two essential tools for the creation of value and for the sustainable growth of the blue economy. These tools, factors of sustainability, are i) safety and ii) blue ethics. In this sense, the project aims to create an integrated offer of added value to water sports in a school environment, with a view to training young people, agents and educators for the main challenges and opportunities of education in a blue economy, which is based on a Blue Ethics, built in Blue Schools, promoted by Blue Minds.	Guarantee conditions and promote nautical sports in school ambience, but not included in the curriculum	33 603,00 €	33 603,00 €	76,68%	25 000,00 €	7 603,00 €
All Sailing in Alqueva	EA.BG.SG53.010.2019	PT-INNOVATION-0030	Câmara Municipal de Moura			Alentejo	Ocean Literacy	Through the development of nautical activities and awareness-raising, Todos à Vela no Alqueva project aims to promote citizen awareness, especially in the school community, for the main problems facing the Ocean, stimulating changes in the behavior, especially among younger generations and the development of skills suited to the challenges of the blue growth paradigm. Thus, the project's main objectives are i) promote Ocean literacy among children and young people from schools in the municipality of Moura, and the population in general, encouraging them to take more informed and responsible attitudes towards aquatic environments and their resources; ii) Provide the learning of nautical knowledge in an extracurricular context that stimulate new generations opinions and the increase their awareness for the sustainable use of the Ocean, Rivers, Lakes and Reservoirs.	Guarantee conditions and promote nautical sports in school ambience, but not included in the curriculum	59 054,00 €	25 000,00 €	100,00%	25 000,00 €	34 054,00 €
Sea's Beashtak	EA.BG.SG53.039.2019	PT-INNOVATION-0031	Ocean Zupia, Lda.	Agrupamento de Escolas da Nazaré Nazaré Maria de Mãe - Associação para o desenvolvimento integrado do conceito da Nazaré		Centro	Ocean Literacy	The Sea's Beashtak Project aims to implement an Ocean literacy action that promotes knowledge about the Ocean, its importance in land systems, its resources and sustainable use, aiming to develop more responsible behaviors that, will allow to implement more sustainable uses of the Ocean and, therefore, improve the quality of life of citizens and the planet in general. It also intends to promote health and well-being through the development of Ocean literacy activities dedicated to active ageing.	Guarantee conditions and promote nautical sports in school ambience, but not included in the curriculum	43 333,00 €	26 236,00 €	95,29%	25 000,00 €	18 333,00 €
VAGOS - a School that is a Nautical Club	EA.BG.SG53.001.2019	PT-INNOVATION-0032	Agrupamento de Escolas de Vagos			Centro	Ocean Literacy	The project Vagos - a School that is a Nautical Club aims to develop a nautical culture, consisting as a new way for the population to relate to water plans and nature in general, as well as providing the participation of the local community in nautical leisure activities. Thus, the Vagos Schools Grouping also works as a club allowing the students with greater sporting potential, to have the possibility of reaching higher levels of sporting performance. In addition, it is intended to increase the widespread and inclusive use of sport, from the perspective of sport for all, whether they are children and young people, active adults, the elderly or special communities.	Guarantee conditions and promote nautical sports in school ambience, but not included in the curriculum	35 700,00 €	35 700,00 €	70,03%	25 000,00 €	10 700,00 €
All Fish Are Noble	EA.BG.SG53.041.2019	PT-INNOVATION-0033	Público - Comunicação Social, S.A.			Área Metropolitana de Lisboa	Ocean Literacy	If we look at the diversity of fish species, Portugal is indeed a rich country. However, with the increases in purchasing power, incoming tourism, and the consequent boom in the restaurant business, there has been a huge pressure on the supposedly noble fish species, the sustainability of which is, in some cases, at risk. Unfortunately, most consumers believe that, regarding wild fish, anything other than sea bass, gilt-head bream, red bream, wreckfish, seabream, bluefin tuna, octopus, monkfish and the like, is not good enough. If we fail to act as both educating consumers and, especially, raising awareness amongst food opinion leaders, we will be steadily heading down a path of rampant destruction of fish stocks. The project All Fish Are Noble aims to create amongst the public, namely, youngsters, cooking school students and the chef community, a habit of consuming fish varieties with a safer stock situation, which, although often dismissed as less noble, bear great culinary potential.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	25 000,00 €	25 000,00 €	100,00%	25 000,00 €	- €
GlobOcean	EA.BG.SG53.011.2019	PT-INNOVATION-0034	Universidade do Algarve	United by Sea		Algarve	Ocean Literacy	The GlobOcean project aims to make known, in a simple, but appropriate and correct way, the World Ocean Assessment report. This document, carried out by the Joint Working Group on the Regular Process of the United Nations General Assembly, results from the first major assessment of the state of the Ocean, the overall assessment of the state of the marine environment, including socio-economic aspects on a continuous and systematic basis, providing regular assessments at global and supra-regional level and an integrated view of environmental, economic, and social aspects. Despite its relevance as an assessment document of the state of the Ocean, from which the strategies and action plans for the Ocean should be thought, the document, eminently technical, lacks a strong outreach campaign, that can reach public and private decision-makers and general society. Thus, the project aims to bridge the gap, transferring the scientific knowledge presented to a more accessible language and disseminate its results so that it can be useful in defining and programming actions.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	24 902,00 €	24 902,00 €	100,00%	24 902,00 €	- €
Oceans Heroes: for an affective citizenship	EA.BG.SG53.004.2019	PT-INNOVATION-0035	Associação Natureza Portugal			Área Metropolitana de Lisboa	Ocean Literacy	The Ocean Heroes project aims, on the one hand, to raise awareness and empower children and young people about issues related to sustainability in general, about the sustainability of marine resources and the importance of nature and the ocean, and on the other hand, to raise awareness and alert to the responsibility and power that each of us, in its different capacities, has in its conservation and valuation, promoting the change of behaviours and making them agents of change in the community in which they operate, and also for the adoption of more sustainable policies. For example, as citizens we can choose more sustainable fish, and we can also demand that decision makers ensure that fishing levels are sustainable. Moreover, the project foresees sessions to present the professional careers that are linked to the ocean.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	23 357,00 €	23 357,00 €	100,00%	23 357,00 €	- €
Once upon a time there was a fish called codfish... For a sustainable use of marine resources	EA.BG.SG53.005.2019	PT-INNOVATION-0036	Instituto de Educação da Universidade de Lisboa			Área Metropolitana de Lisboa	Ocean Literacy	In Portugal, cod fishing is an important activity in the supply of a product with a high protein content, as an alternative to meat consumption. The salted and dried cod was a cheap product, available and easily preserved, and has therefore entered the consumption habits of the Portuguese population until today. Contrary to what happened in other countries, whose eating habits started mainly to include frozen fish, Portugal did not abandon the consumption of salted and dried cod, being today the biggest consumer of this product. Currently, Atlantic cod is on the list of endangered species by the International Union for the Conservation of Nature. Considering this problematic and the need to develop innovative educational practices, this project aims to contribute to the investigation and adoption of innovative learning strategies, strongly supported by current digital technologies, through the creation and didactic explanation of digital learning objects, and their testing in a school context, with the aim of understanding their impact on science teaching and learning.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	29 401,00 €	29 401,00 €	85,03%	25 000,00 €	4 401,00 €
How we see the Ocean - An interactive experience	EA.BG.SG53.007.2019	PT-INNOVATION-0037	Instituto de Geografia e Ordenamento do Território da Universidade de Lisboa			Centro	Ocean Literacy	Portugal has most of its population living in the coast where they develop their activities, whether related to the Ocean or not. This project aims to assess the community knowledge about the Ocean and the coastline, through the perception of individuals from different generations, from the youngest to the grandparents. It will be developed in the municipality of Peniche, where the main activities are fisheries, tourism, leisure (is one of the most important surfing areas), and agriculture. The coastal zone is diverse where most beaches and foredunes have been submitted to conservation programs after strong erosion and floods during heavy storms. The diagnosis intends to demonstrate i) the importance and balance between formal and non-formal education on the Ocean and the coast, based on different perception of students, parents and grandparents, and teachers, ii) how to use free easy tools; iii) how to make education attractive and iv) how to improve literacy related to the Ocean and the coast.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 598,00 €	24 598,00 €	100,00%	24 598,00 €	- €
Know to preserve   Sea urchin	EA.BG.SG53.008.2019	PT-INNOVATION-0038	Município de Torres Vedras	Seminário Liceal de Penafirme		Centro	Ocean Literacy	The project Know to preserve   Sea urchin aims to raise awareness among the population of Torres Vedras municipality for issues related to the ocean, considering the study of the sea urchin, a species of extreme importance in the balance of ecosystems and for the local population. The project's intervention strategy is outlined in three combined axes that will act in the promotion of Ocean literacy: i) Educate, which aims to promote critical thinking and enhance the direct contact between the school community and the object of study; ii) Train, which aims to provide teachers with tools to disseminate knowledge in the area of Ocean literacy, encouraging the development of new practices and iii) Communicate, which seeks to increase the dissemination of information to a wider audience through outreach campaigns.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	36 839,00 €	33 063,00 €	75,61%	25 000,00 €	11 839,00 €
EduMar, Know to protect	EA.BG.SG53.012.2019	PT-INNOVATION-0039	Associação Portuguesa do Lixo Marinho	Colégio Valsassina, SA Instituto Nossa Senhora da Encarnação Cooperativa de Ensino e Cultura, Crl		Área Metropolitana de Lisboa	Ocean Literacy	The EduMar, Know to protect project aims to promote awareness of the problems facing the Ocean and encourages creativity, a spirit of initiative and action to change behaviors. The project has three interconnected components, but with different objectives: i) Awareness raising, which aims to involve the school community and the rest of the community in carrying out specific activities; ii) Education, which aims to involve some classes in the creation of games and development of artistic projects; iii) Training, which aims to carry out an accredited training course for teachers and training actions for educational assistants.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 328,00 €	24 328,00 €	100,00%	24 328,00 €	- €
Deep Listening Deep Sealing (DLDS)	EA.BG.SG53.016.2019	PT-INNOVATION-0040	Companhia de Música Teatral	Associação Academia MIAMAS - Marvão International Academy for Music, Arts and Science/Fábrica Centro Ciência Viva de Aveiro - Universidade de Aveiro	University of Bergen	Centro	Ocean Literacy	Advances in oceanic submersibles, imaging and sampling technologies are contributing to incredible biological and geological discoveries. Unravelling the mysteries of the deep Ocean is a challenge for the scientific community, but getting this information out to the general public, particularly youngsters, will help develop their critical thinking: a powerful tool for changing attitudes. The Deep Listening Deep Sealing project, through artistic experiments, intends to increase Ocean literacy by drawing attention to the deep Ocean as it is wider, less known and extremely important for life on Earth.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	23 970,00 €	22 270,00 €	100,00%	22 270,00 €	1 700,00 €
EAT & ART Creativity & OCEAN Literacy	EA.BG.SG53.017.2019	PT-INNOVATION-0041	ALATI CAN Lda.			Área Metropolitana de Lisboa	Ocean Literacy	The project EAT & ART Creativity & OCEAN Literacy aims to provide an effective response to the lack of collective and concerted promotion strategies for national canned food, thus contributing to increase the value created and sustainable growth of the canning industry. With this project it is intended to encourage a repositioning of the image associated with canned food, creating a new vision of this product among all segments of society. Besides its contribution to the dissemination and notoriety of canned food, it seeks to create the necessary conditions that allow consumers to make an informed choice, fostering the importance attributed by them to healthy and sustainable products, while promoting the companies and brands of the national canning industry. Through art, it aims to sensitize society (citizens and all stakeholders) to assume informed and responsible attitudes towards the Ocean and its resources.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	35 194,00 €	35 194,00 €	71,04%	25 000,00 €	10 194,00 €
ECOMARE - SOS Marine Animals	EA.BG.SG53.018.2019	PT-INNOVATION-0042	Universidade de Aveiro			Centro	Ocean Literacy	Despite the high biodiversity of marine predators in Portugal, most people are unaware of the importance of national waters in the conservation of these marine species, which are threatened at European level. The Project ECOMARE - SOS Marine Animals aims to increase Ocean literacy on the threats that marine predators face, promoting interest in the need for conservation of marine ecosystems, and acting to trigger changes in behaviors, especially of school communities in the coastal regions of Aveiro.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	46 819,00 €	25 000,00 €	100,00%	25 000,00 €	21 819,00 €
THE PLASTIC DETECTIVES OF PORTUGAL	EA.BG.SG53.019.2019	PT-INNOVATION-0043	Centro Ciencia Viva do Algarve		SALT Lofoten AS	Algarve	Ocean Literacy	Marine litter is one of the most visible and harmful growing environmental challenges today, with an accumulation of plastic in the ocean worldwide. Beach cleaning is a good way of removing marine litter from our environment, but the best solution is to prevent the litter from ending up in the Ocean. Thus, awareness campaigns are the most efficient, cost-effective, and long-lasting solution to this problem. The Plastic Detectives of Portugal project is a combination of academic knowledge sharing, educational outreach, and practical work. Through reflection on the origin, time, and distance of litter transport in the Ocean, the project aims to increase the level of Ocean literacy in the school community and society in general in the region of Faro. By inspiring and motivating young people and school staff, it is intended to create an experience of having personally contributed to a far-reaching awareness campaign against marine litter.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 997,00 €	24 997,00 €	100,00%	24 997,00 €	- €
Blue Alternative	EA.BG.SG53.021.2019	PT-INNOVATION-0044	Comunidade Intermunicipal do Alto Minho	Agrupamento de Escolas de Santa Maria Maior		Norte	Ocean Literacy	The project Blue Alternative aims to bring the blue school closer to Alto Minho local communities and the sea sector by promoting non-formal education activities in schools, such as artistic actions and actions that favour interaction between students and the blue economy. In addition, it intends to encourage blue entrepreneurship and promote awareness among students of blue careers, through interaction between students and the professional path in the nautical and maritime areas.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 822,00 €	24 822,00 €	100,00%	24 822,00 €	- €
OceanClass - From the ocean to the classroom	EA.BG.SG53.022.2019	PT-INNOVATION-0045	CIMAR - Centro Interdisciplinar de Investigação Marinha e Ambiental			Norte	Ocean Literacy	Nowadays, there is a very limited work related to Ocean in the classroom by elementary schools in general, including those in the countryside. This situation stems from the lack of up-to-date scientific knowledge by teachers and resources they can easily fit into the curricular needs of students. The OceanClass project aims to address these limitations by promoting the work related to Ocean in the elementary school classroom, and empowering future generations and the common citizen to protect the Ocean and adopt more sustainable attitudes in the long term.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	25 000,00 €	25 000,00 €	100,00%	25 000,00 €	- €
The Ocean of (my) future	EA.BG.SG53.023.2019	PT-INNOVATION-0046	FÓRUM OCEANO - Associação da Economia do Mar	Colégio Valsassina, SA Faculdade de Ciências da Universidade de Lisboa	GCC Ocean Technology AS	Área Metropolitana de Lisboa	Ocean Literacy	The Ocean of (my) future project aims to increase knowledge about different sectors of the blue economy, providing an overview on future "blue careers", including blue entrepreneurship. It is aimed at secondary school students, namely in the 12th grade, who are in a decisive stage of choosing their vocations and intends to create in these young people a proactive attitude and behaviour in relation to the Ocean and its sustainable uses, as well as to the opportunities and challenges in their professional future. The project highlights key sectors of blue growth: i) aquaculture and fish industry; ii) blue biotechnology; iii) maritime technology; iv) nautical sports; v) sustainability, marine environment, and biodiversity and vi) social sciences (public policies, economy, and law).	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 971,00 €	24 971,00 €	100,00%	24 971,00 €	- €

SB Oceans-Junior Edition	EEA.BG.SG53.025.2019	PT-INNOVATION-0047	BIORUMO - Consultoria em Ambiente e Sustentabilidade, Lda.		Norte	Ocean Literacy	SB Oceans - Junior Edition aims to develop an environmental awareness campaign focused on the themes of the Ocean and blue economy, providing a stage for the discussion of the importance of Ocean conservation, and encouraging citizens, policy makers and economic actors to become drivers of change in supporting the protection and sustainable use of marine resources. It intends to achieve greater involvement of higher education students in preserving the Ocean, as well as spark the interest in pursuing careers related to its sustainability.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	24 250,00 €	24 250,00 €	100,00%	24 250,00 €	- €
Ver para Querer	EEA.BG.SG53.026.2019	PT-INNOVATION-0048	Centro Ciência Viva de Lagos	Agrupamento de Escolas Gil Eanes Agrupamento de Escolas Júlio Dentis	Algarve	Ocean Literacy	Ver para Querer is a project whose main objective is to raise awareness and knowledge about marine and coastal issues. It aims to contribute to the knowledge of the Ocean and raise awareness of the duty to conserve Natural Heritage, through behavioural change, as well as to promote the scientific and technological culture and increase Ocean literacy.  This project intends to encourage citizens involvement in the themes of the Sea, in order to promote a culture of respect for the Ocean and boost the construction of a bluer society. Thus, Ver para Querer is based on three lines of action involving the following themes: The Sea as a resource; The Sea as heritage / memory; The Sea as pleasure / entertainment.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	35 426,00 €	35 426,00 €	70,57%	25 000,00 €	10 426,00 €
Sea Giants - Performing Arts Project for Awareness and Preservation of the Azores Marine Ecosystems	EEA.BG.SG53.027.2019	PT-INNOVATION-0049	OMA - Observatório do Mar dos Açores	Associação Cultural Teatro de Giz Câmara Municipal da Horta Observatório do Mar dos Açores#156	Região Autónoma dos Açores	Ocean Literacy	Sea Giants project aims to amplify Ocean literacy of the Azorean community, sensitizing the population to marine ecosystems and the species that inhabit the surrounding sea and promoting an active perception of the importance of the Marine Protected Areas (AMP) of the Azores. It intends to involve the community in issues related to the sea, encouraging their active participation, and helping them to have a conscious voice towards policy makers and future sea policies.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	25 843,00 €	23 764,00 €	100,00%	23 764,00 €	2 080,00 €
BlueWave - Ocean: Earth's lung - education towards a BLUE society and promotion of Wellfare attentiveness and consciousness of the Sea	EEA.BG.SG53.028.2019	PT-INNOVATION-0050	Universidade de Coimbra	Associação Portuguesa de Educação Ambiental	Centro	Ocean Literacy	The BlueWave project aims to promote Ocean literacy in a school context through educational sessions in Portuguese secondary schools integrated in the Escola Azul network and teacher training sessions. It aims to promote sensitization, education and active participation of the younger generations regarding Ocean literacy competencies and behavioral changes towards better ocean exploration practices. Upon participation in each activity, each student will receive a BlueWave passport stamp.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	33 624,00 €	33 624,00 €	74,35%	25 000,00 €	8 624,00 €
TransformAR: Ocean Literacy project in Esposende	EEA.BG.SG53.030.2019	PT-INNOVATION-0051	Município de Esposende	Agrupamento de Escolas António Correia de Oliveira Agrupamento de Escolas António Rodrigues Sampaio EAMb - Espórtimo Ambiente, EM – Sociedade Unipessoal, Lda.	Centro	Ocean Literacy	TransformAR project aims to contribute to greater knowledge of the impacts on the Ocean, resulting from human activities, and consequently, to individual and collective commitment to mitigating the problems that affect water bodies. It also intends to favor and consolidate the feeling of belonging to the natural heritage and the acknowledgement of the importance of preserving marine habitats, increase the active involvement of citizens in general and, specifically the youngsters towards the Ocean.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	33 705,00 €	33 705,00 €	74,17%	25 000,00 €	8 705,00 €
GONE - A Drop in the Ocean	EEA.BG.SG53.032.2019	PT-INNOVATION-0052	Universidade do Minho		Norte	Ocean Literacy	The project GONE - A Drop in the Ocean aims to make citizens capable of making informed and responsible decisions about the Ocean and its resources. Although this is a consolidated issue on the political agenda and several indicators show that awareness of the Ocean has been increasing, it still does not translate into significant benefits for its sustainable development. This fact seems to show that traditional environmental education actions have not been enough, as these normally attract a school-age audience or people already aware of these issues. Thus, it is essential to monitor changes and trends in the behavior of the target audience of awareness campaigns, or there is a risk that they have a limited reach and impact. At a time when the internet opens borders and creates new paths, this project intends, through one of the most comprehensive and most vital means of communication today, to communicate science, in particular Ocean Literacy.	Promotion of blue growth ocean literacy awareness raising campaigns for society.	19 591,00 €	19 591,00 €	100,00%	19 591,00 €	- €
Ocean Routes: exploring and enhancing the maritime culture of Esposende	EEA.BG.SG53.033.2019	PT-INNOVATION-0053	Rio Neiva - Associação de Defesa de Ambiente	Agrupamento de Escolas António Rodrigues Sampaio	Norte	Ocean Literacy	The Ocean Routes project aims to explore, highlight, and relate different dimensions of maritime culture in Esposende, focusing on the following aspects: i) local biodiversity; ii) civilizations and history; iii) flavours and local cuisine; iv) nautical sport; v) maritime literature and music; and vi) future and sustainability.  Considering that the study of Ocean Literacy must start from the territory where it is located, this project intends to promote a global and interdisciplinary vision of the existing richness in terms of maritime culture. Therefore, an innovative model based on citizen science is proposed as working method, as a promoter of scientific and critical thinking, as a way of getting to know the territory with the school community in the region of Esposende.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	24 913,00 €	24 913,00 €	100,00%	24 913,00 €	- €
Blue Games	EEA.BG.SG53.035.2019	PT-INNOVATION-0054	Lufinha - Unipessoal, Lda.		Área Metropolitana de Lisboa	Ocean Literacy	The Blue Games are all about bringing together a selection of teams of students from several candidate schools, in a worldwide unique and pioneer event format, that gives them the opportunity to show what they have learned and know about the Ocean, through healthy competition with team games focused on the several areas of Ocean literacy. Associated with a national communication plan, capable of reaching and influencing society, it is intended to educate and change behaviour for the future of the planet.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	28 516,00 €	24 697,00 €	100,00%	24 697,00 €	3 819,00 €
Kids Dive: Portugal - Norway	EEA.BG.SG53.036.2019	PT-INNOVATION-0055	Instituto Superior de Psicologia Aplicada, ICSL	Agrupamento de Escolas Professor Agostinho da Silva Câmara Municipal de Sintra	Área Metropolitana de Lisboa	Ocean Literacy	The Kids Dive: Portugal - Norway project aims to train young students from Portugal and Norway, in the context of Ocean Literacy, promoting awareness of the natural heritage that can be found underwater. Through practical activities related to scuba diving, the problem of plastics and biodiversity and marine ecosystems protection, the project intends a more informed, integrated, and active society, while promoting international cooperation and cultural sharing.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	25 000,00 €	25 000,00 €	100,00%	25 000,00 €	- €
blueTIDE - Ocean Literacy Towards and Integrated and Dynamic Education	EEA.BG.SG53.040.2019	PT-INNOVATION-0056	Incubadora de Empresas da Figueira da Foz	Faculdade de Ciências da Universidade de Lisboa Instituto Politécnico de Leiria Universidade de Coimbra Universidade de Évora	Centro	Ocean Literacy	Despite the recognized importance of intertidal rocky shores, there are still gaps in the conservation of the vast group of intertidal species, many of which are threatened by habitat destruction, climate change, pollution, and fishing. The blueTIDE project proposes to increase the knowledge about, and the emotional bond with, these coastal systems, targeting elementary students and teachers from four geographic areas: Figueira da Foz / Sardão, Peniche / Vila Nova da Barquinha, Setúbal / Santarém, and Sines / Évora.  The project will contribute to: i) strengthen the connection of children with the Ocean and motivate them for conservation, namely intertidal rocky shores; ii) promote the interaction between schools and ocean science researchers; iii) stimulate the cooperation between Blue Schools and non-Blue Schools; iv) foster students' creativity, initiative, and communication skills; v) strengthen marine science-based teaching practices; and ultimately, vi) encourage the application of new Blue Schools.	Raising awareness for marine and maritime issues (ocean literacy initiatives), within or in partnership with elementary and/or secondary schools ("Blue Shools").	32 204,00 €	32 204,00 €	77,63%	25 000,00 €	7 204,00 €
Atlantis Program	EEA.BG.SG53.044.2019	PT-INNOVATION-0057	Oceans and Flow Unipessoal Lda.
