**APATA**

# FoRES - Project

---

## OBJECTIVES

- 1** Strengthen climate change adaptation by...
- 2** Promoting forest areas resilience, responsiveness and adaptation to expected future climate change.
- 3** Designing and testing alternative nature-based forest management strategies (pilot-projects).

## Goal

**Nature-based solutions that maximize forest areas resilience to spatio-temporal propagation of forest fires, capacity for CO<sub>2</sub> sequestration and soil moisture retention.**

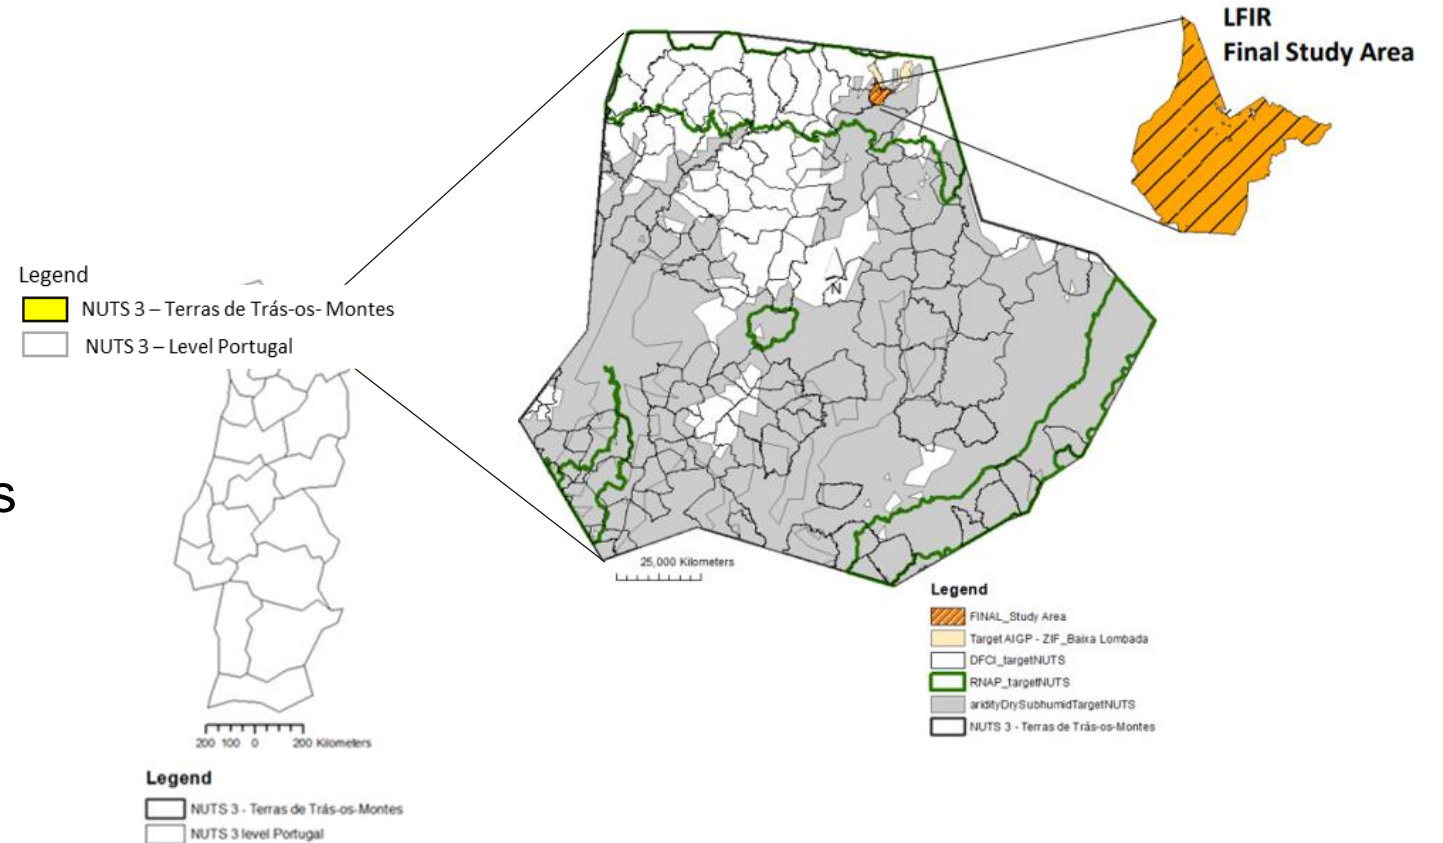

# FoRES – Study area

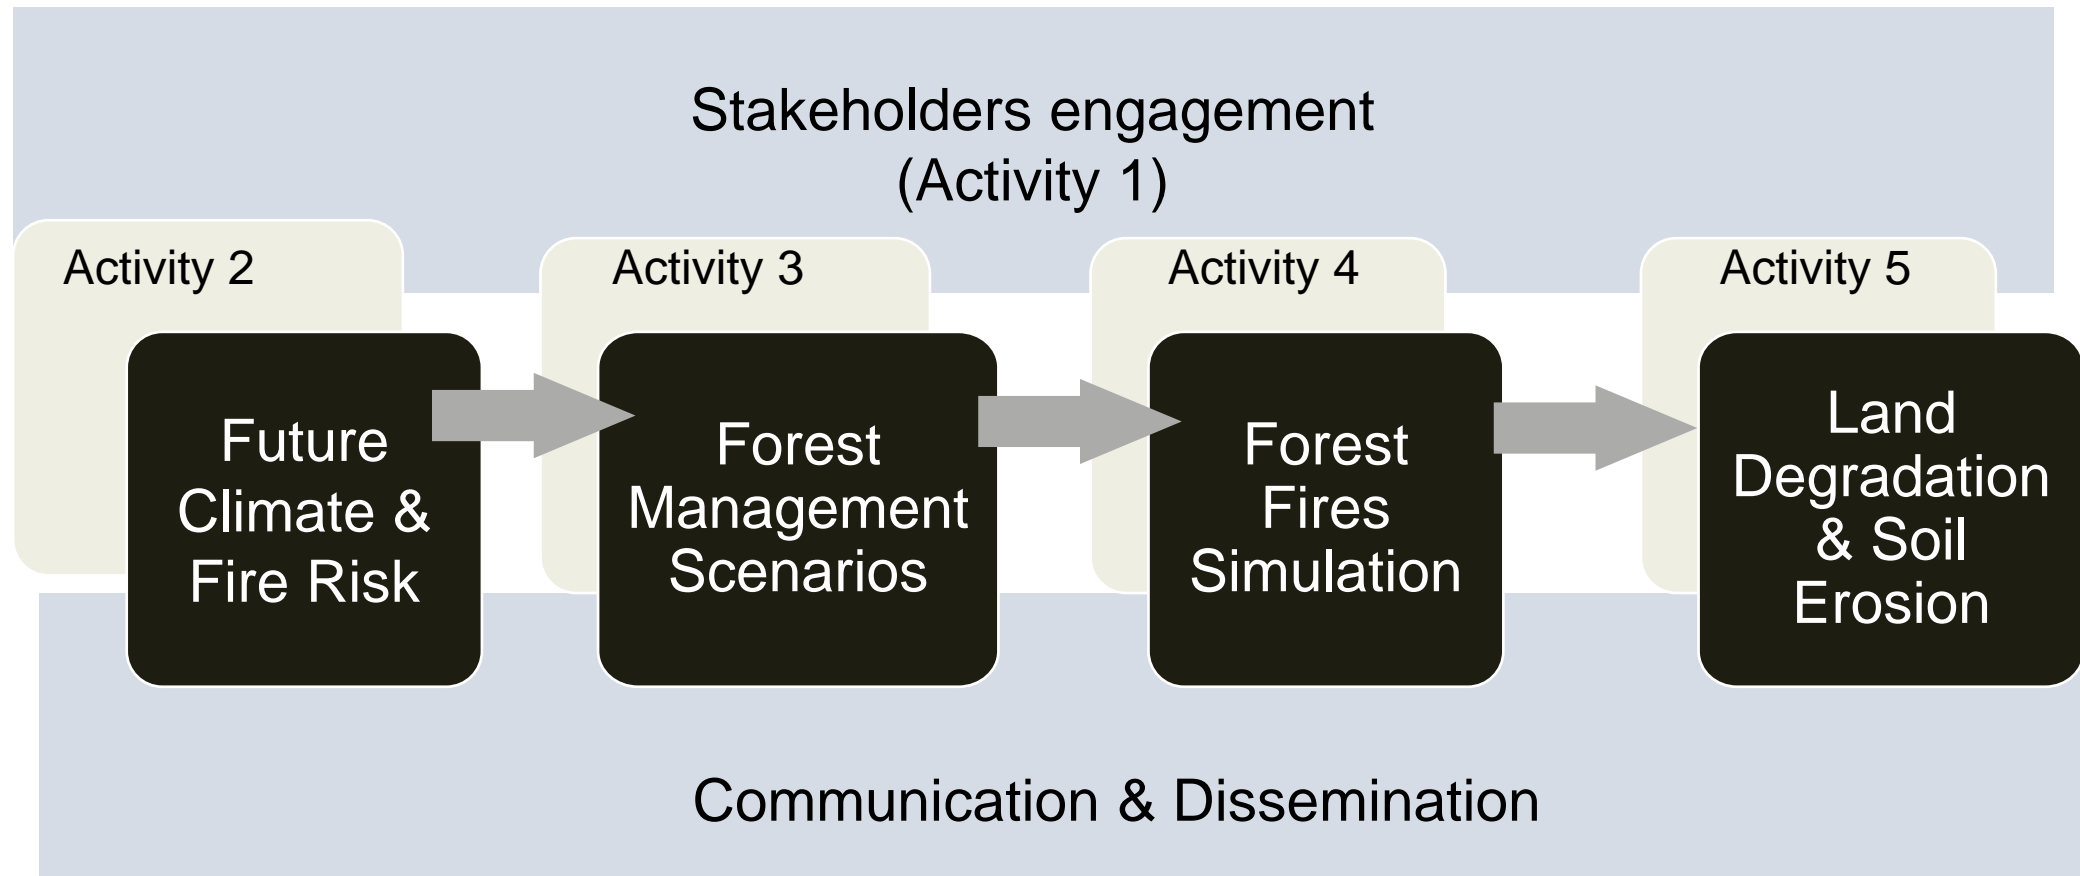

## Baixa da Lombada

### Criteria:

- Political (NUTS3 & AGIP)
- Management and conservation (RNAP & DNCIF)
- Ecological & Climatic characteristics (aridity)
